Over the years, ROBLOX has used advertising to generate revenue for their company, which they generate through in-game purchases (microtransactions) or advertisements (which can be annoying for the players). In addition to this, they also generate revenue through selling virtual items (like the aforementioned Builders Club and ROBLOX Credit). The company has also released several games like their top grossing game "Build a Buddy". ROBLOX has been criticized for its lack of funding from advertisers as well as allowing other companies to make games on ROBLOX. The company has been criticized for their children friendly ads which are designed to be easily visible by children but are very inappropriate for them which is seen as a breach of the COPPA (Children's Online Privacy Protection Act) and their end user license agreement, although ROBLOX has since changed its policy. The company also uses an "Ads on the Web" program where they can serve certain types of ads depending upon a player's age and location.

One of the common ways that hackers can hack Roblox is by using a proxy service. A proxy server is an intermediary server that acts as an agent between two network entities. A hacker can use a proxy program in order to reach another user's information. When another user logs onto their account using this program, the main computer uses the proxy server first before it accesses Roblox. This hacking method is typically used by spammers to hack Roblox accounts

and obtain personal information such as passwords and usernames that are used for cyberbullying. One of the more advanced techniques of hacking Roblox is through phishing. Phishing involves sending an email that is designed to look like it is coming from a trusted source. The email will ask for the users' login credentials or ask them to click on something else like a link or an attachment. If the user clicks on the link, they will be redirected to a fake website that looks like something they have visited before. Hackers can use this method to access other's accounts by using another person's credentials.
